

FLEET ELECTRIFICATION ASSESSMENT

The Future of Fleets Awaits

Electric vehicle (EV) and charging options are expanding quickly, improving feasibility and enhancing benefits of fleet electrification. ComEd's Fleet Electrification Assessment can help you plan this critical transition through a comprehensive assessment to identify vehicles and charging infrastructure to meet your fleet's needs. Transitioning to electric fleet vehicles can bring a surplus of benefits ranging from lower maintenance and operating costs to improved air quality for your employees and your community. Now's the time to get started on the path toward a more efficient, cleaner fleet.

Personalized Electrification Advisory Services

A growing number of fleet managers are finding the transition to electric vehicles capable of delivering meaningful emission reductions and fuel savings. ComEd's Fleet Electrification Assessment is designed to help you plan the most effective transition for your organization, considering your goals and operations. As a complement to our online toolkit and electrification incentives, the assessment service will provide one-on-one guidance to determine the best options for optimizing your fleet. This advisory will assist you in:

Selecting proper vehicles
for your fleet

Identifying ComEd incentives
and other funding

Planning out your
charging needs

Quantifying your total cost of ownership
and overall emissions impact

Don't let your fleet get left behind. Let ComEd help you blaze the trail towards saving and sustainability.

Get Started.
